Professional Summary

Backend software developer with 3+ years of experience specializing in GenAI, RAG, and agentic systems. Has shipped production LLM applications and multi-agent workflows for hiring automation, legal-tech, and enterprise compliance platforms, most recently working end-to-end as an AI Full Stack Developer. Builds with LangChain, LangGraph, and major LLM providers including OpenAI, Anthropic, and AWS Bedrock, backed by relational, NoSQL, and vector databases.

Professional Experience

AI Full Stack Developer

January 2026 – August 2026

Xperion

- **DreamIT:** Led technical development of DreamIT, an internal company management platform adopted by 250+ employees, spanning project delivery, time tracking, financials, resource management, and performance analytics, with integrations into BambooHR, NetSuite, KnowBe4, and campus training systems.
- **AI-Automated Hiring Pipeline:** Led development of an AWS Bedrock-powered hiring pipeline that cut time-to-decision from two to three weeks down to four to five days by automating candidate screening and interview scheduling, including its Foloup (video-interview) and Gorilla (coding-assessment) modules, monitored via a self-hosted Arize Phoenix deployment.
- **POD Journey:** Contributed to the development of POD Journey, an agile team-management platform integrated with DreamIT for shared project and resource data. Supported 30-day constitution and 90-day Kaizen cycles with maturity assessments, DORA and capability metrics, automated notifications, and performance monitoring.

AI Backend Engineer

July 2024 – December 2025

Quest

- **AI-Powered Courtroom Hearing Portal:** Cut a multi-week manual hearing-documentation process to zero effort by leading backend development (FastAPI) of an AI courtroom hearing portal for Maui, Kaua'i, and Hawai'i counties, automating video ingestion, speaker-identified transcripts, and an in-meeting chatbot across 10 daily hearings, plus monthly topic-based newsletters.
- **Multi-Agent Workflow Automation Assistant:** Reduced HR's exam-registration workload to a single review step by building a multi-agent copilot (LangGraph) that automates registration, challan generation, and payment verification for 8 to 9 monthly exams across 3 cities (500+ registrations each).
- **Academic Compliance and Evaluation Assistant:** Reduced faculty review workload for UAE accreditation audits by developing an AI compliance assistant that analyzes 45 to 50 documents per course against Bloom's Taxonomy matrices for PLO/CLO alignment.
- **Agentic RAG for Multi-Hop QA:** Reduced incomplete and inaccurate answers across multiple production RAG bots by engineering an agentic RAG framework (LangChain, LangGraph, ChromaDB) using multi-hop, chain-of-thought reasoning.

Python Backend Developer

July 2023 – June 2024

Codeaza Technologies

- **Sentimantle:** Built backend pipelines processing hundreds of thousands of AI-curated reviews from Google, Booking.com, and TripAdvisor, powering a unified sentiment-tracking dashboard for hospitality clients.
- **Home Schooling Platform:** Engineered a school management platform for an Australian home-schooling provider across 6 states (NSW, VIC, QLD, SA, WA, TAS), consolidating curriculum, student administration, and AI-driven performance reporting.
- **Work Book:** Cut manual rulebook reviews from 7.5 hrs/week per person by designing backend architecture for an AI compliance-monitoring platform for investment banks, replacing them with automated version comparison and plain-English action items.

Education

Bachelor of Science in Computer Science

2019 – 2023

FAST-NUCES, Islamabad, Pakistan

Teaching Assistant: Computer Networks

Technical Skills

- **Languages:** Python, JavaScript (Node.js)
- **Frameworks & Libraries:** FastAPI, Flask, LangChain, LangGraph, Docling
- **LLM & AI Services:** OpenAI, Anthropic Claude, Google Gemini, AWS Bedrock, Ollama, Deepgram
- **Databases:** PostgreSQL, MySQL, MongoDB, Supabase, Elasticsearch, ChromaDB, Pinecone
- **Cloud & DevOps:** AWS, Google Cloud Platform, DigitalOcean, Dokploy, CI/CD, Docker, Git & GitHub, RabbitMQ
- **Tools & Technologies:** n8n, REST APIs, WebSockets, Microservices, RAG Systems, Multi-Agent Architectures, Arize Phoenix
